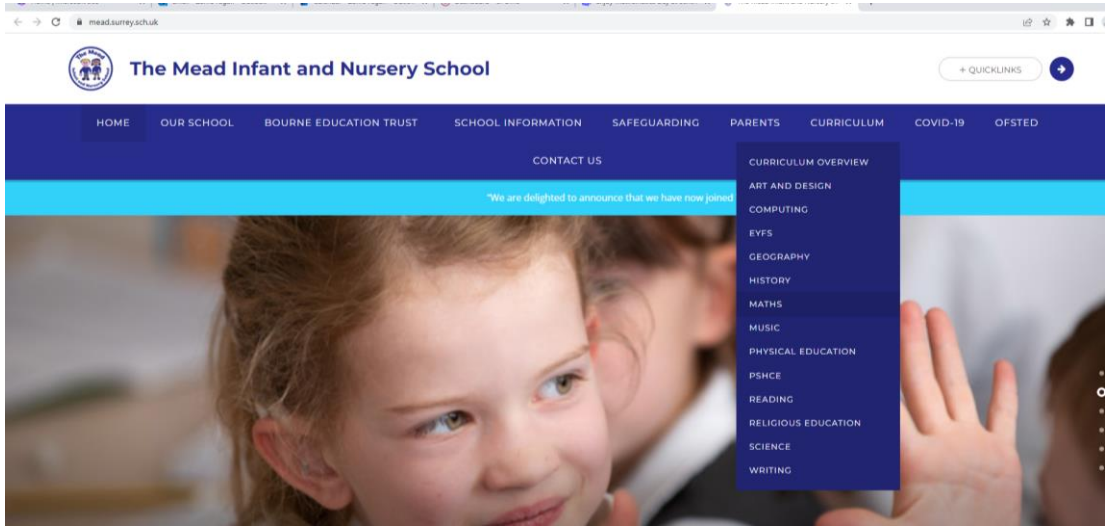
Year 2 Maths Workshop

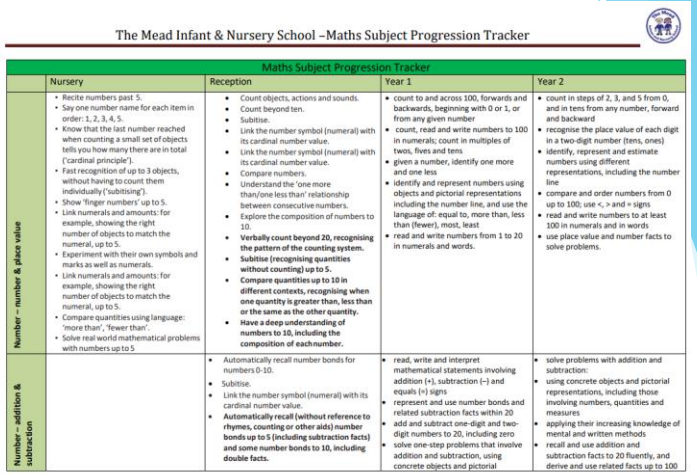
Aims of the session today

- To share the curriculum objectives / implementation of maths at The Mead
- To understand key mathematical concepts
- To share strategies and resources used in school to teach the 4 calculations
    - Addition
    - Subtraction
    - Multiplication
    - Division
- To share ways to support your child at home

Maths Curriculum

- Available on the school website under Curriculum and Maths



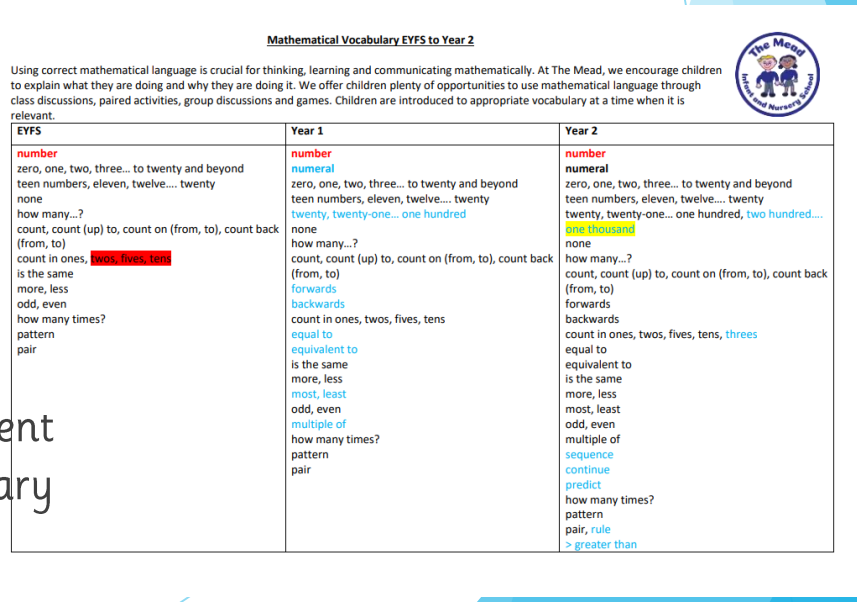


The Mead Infant & Nursery School –Maths Subject Progression Tracker

Maths Subject Progression Tracker

	Nursery	Reception	Year 1	Year 2
Number – number & place value	• Recite numbers past 5. • Say one number name for each item in order: 1, 2, 3, 4, 5. • Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle'). • Fast recognition of up to 3 objects, without having to count them individually ('subitising'). • Show 'finger numbers' up to 5. • Link numerals and amounts: for example, showing the right number of objects to match the numeral, up to 5. • Experiment with their own symbols and marks as well as numerals. • Link numerals and amounts: for example, showing the right number of objects to match the numeral, up to 5. • Compare quantities using language: 'more than', 'fewer than'. • Solve real world mathematical problems with numbers up to 5	• Count objects, actions and sounds. • Count beyond ten. • Subitise. • Link the number symbol (numeral) with its cardinal number value. • Link the number symbol (numeral) with its cardinal number value. • Compare numbers. • Understand the 'one more than/one less than' relationship between consecutive numbers. • Explore the composition of numbers to 10. • **Verbally count beyond 20, recognising the pattern of the counting system.** • **Subitise (recognising quantities without counting) up to 5.** • **Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity.** • **Have a deep understanding of numbers to 10, including the composition of each number.**	• count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number • count, read and write numbers to 100 in numerals; count in multiples of twos, fives and tens • given a number, identify one more and one less • identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least • read and write numbers from 1 to 20 in numerals and words.	• count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward • recognise the place value of each digit in a two-digit number (tens, ones) • identify, represent and estimate numbers using different representations, including the number line • compare and order numbers from 0 up to 100; use <, > and = signs • read and write numbers to at least 100 in numerals and in words • use place value and number facts to solve problems.
Number – addition & subtraction		• Automatically recall number bonds for numbers 0-10. • Subitise. • Link the number symbol (numeral) with its cardinal number value. • **Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.**	• read, write and interpret mathematical statements involving addition (+), subtraction (–) and equals (=) signs • represent and use number bonds and related subtraction facts within 20 • add and subtract one-digit and two-digit numbers to 20, including zero • solve one-step problems that involve addition and subtraction, using concrete objects and pictorial	• solve problems with addition and subtraction: • using concrete objects and pictorial representations, including those involving numbers, quantities and measures • applying their increasing knowledge of mental and written methods • recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100

- Maths progression tracker which shows objectives in each area (e.g. number / place value / addition) from nursery to year 2



Mathematical Vocabulary EYFS to Year 2

Using correct mathematical language is crucial for thinking, learning and communicating mathematically. At The Mead, we encourage children to explain what they are doing and why they are doing it. We offer children plenty of opportunities to use mathematical language through class discussions, paired activities, group discussions and games. Children are introduced to appropriate vocabulary at a time when it is relevant.

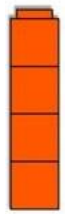
EYFS	Year 1	Year 2
number zero, one, two, three… to twenty and beyond teen numbers, eleven, twelve…. twenty none how many…? count, count (up) to, count on (from, to), count back (from, to) count in ones, twos, fives, tens is the same more, less odd, even how many times? pattern pair	number numeral zero, one, two, three… to twenty and beyond teen numbers, eleven, twelve…. twenty twenty, twenty-one… one hundred none how many…? count, count (up) to, count on (from, to), count back (from, to) forwards backwards count in ones, twos, fives, tens equal to equivalent to is the same more, less most, least odd, even multiple of how many times? pattern pair	number numeral zero, one, two, three… to twenty and beyond teen numbers, eleven, twelve…. twenty twenty, twenty-one… one hundred, two hundred…. one thousand none how many…? count, count (up) to, count on (from, to), count back (from, to) forwards backwards count in ones, twos, fives, tens, threes equal to equivalent to is the same more, less most, least odd, even multiple of sequence continue predict how many times? pattern pair, rule > greater than

- Mathematical vocabulary document which highlights the key vocabulary used in each year group

Maths – Concrete – Pictorial - Abstract

Concrete

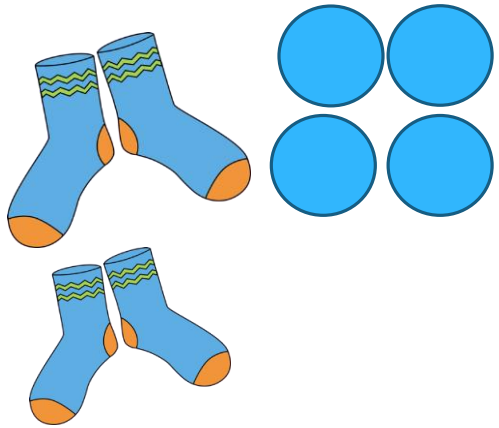
Introduces real objects and Maths resources that children can use to 'do' the maths.

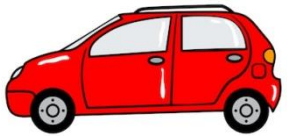


Use at any time and with any age to support understanding

Pictorial

This stage uses pictorial representations of objects to let children 'see' what a maths problem looks like.





Abstract

This stage uses numerals and symbols. It is imperative that children are not moved to this stage too quickly!

$$6 + 3 =$$

$$4 \times 2 =$$

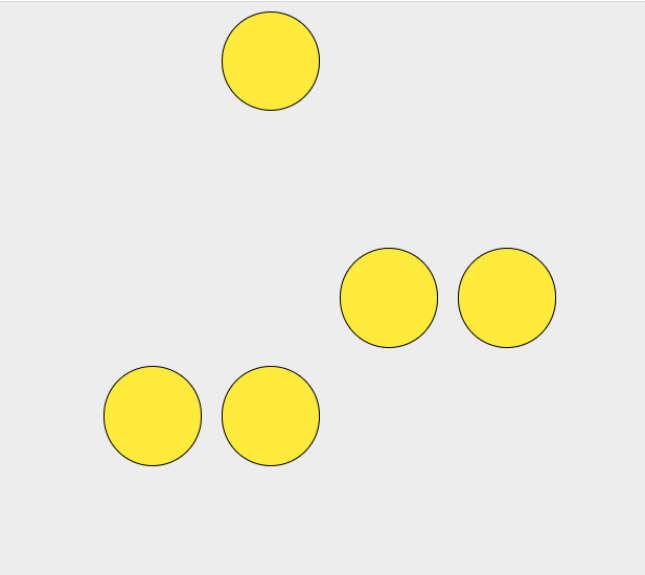
If a child is finding an area difficult – take a step back (e.g. if a child is finding written addition calculations difficult, use concrete objects to support)

Children need to be secure in concrete before they can move on to pictorial and they need to be secure in pictorial before they can move on to abstract

Key mathematical skills / concepts

- Subitising
- Number bonds
- **Counting forwards and backwards from any given number**
- Counting in 1's, 2's, 5's and 10's
- Place value
- Part/whole

Subitising and Number bonds



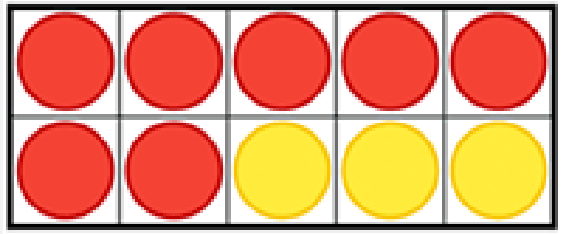
What do you notice?

How did you see it?

Look at it in a different way and describe what you see

Draw how you see it (in the air / on some paper etc)

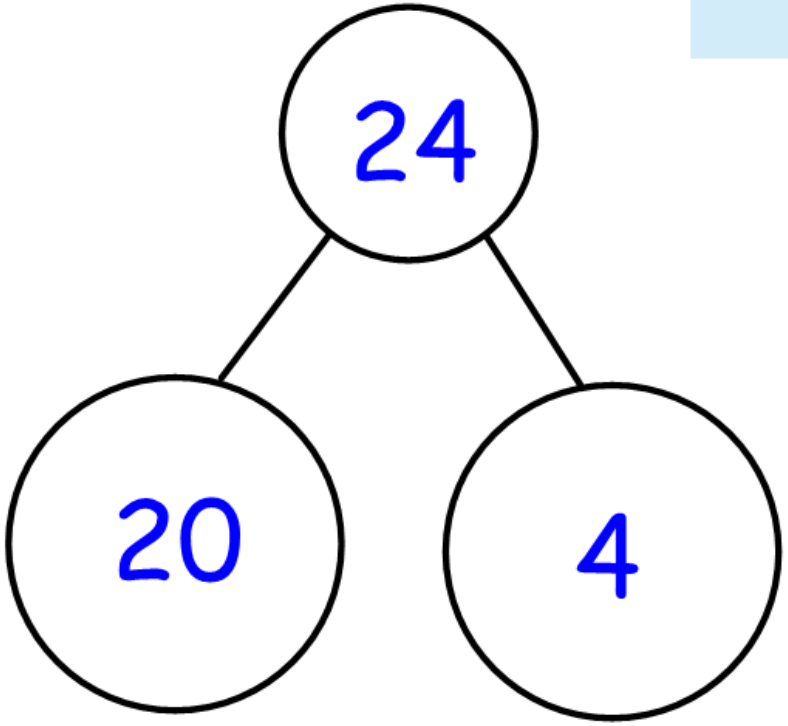
Ask someone else how they see it – was it the same way as you?

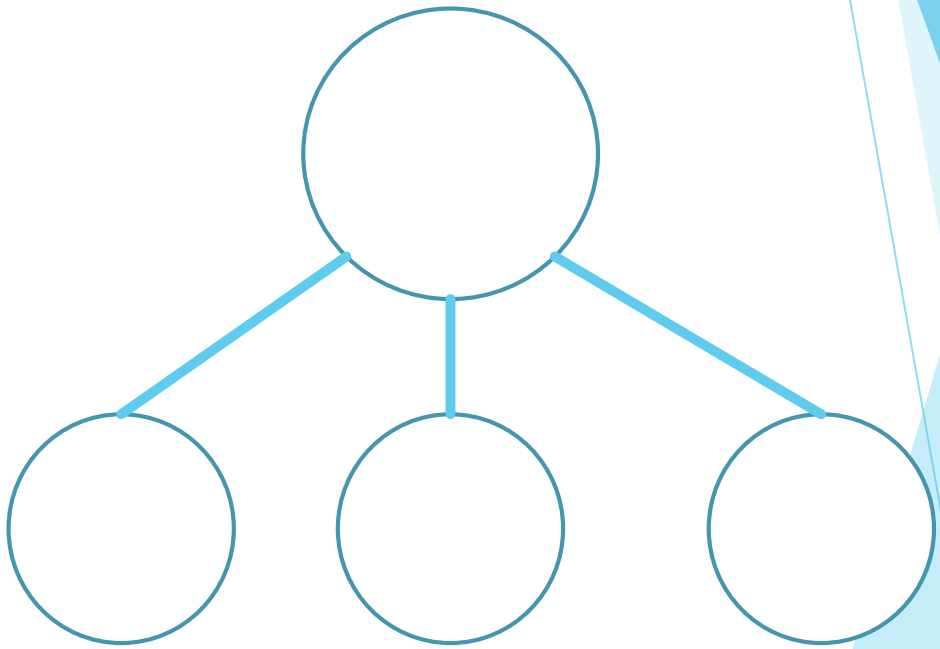


Subitising helps to support number bond recall and understand the composition of numbers

Part whole

10	
6	4





Number & Place Value

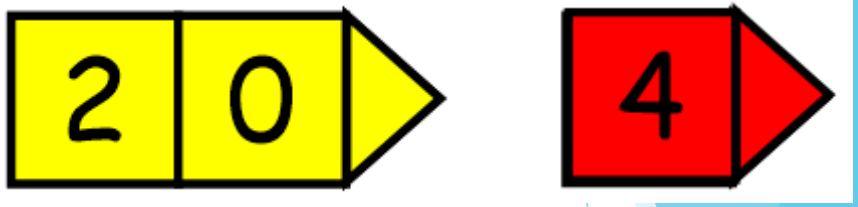
- count in steps of 2, 3, and 5 from 0, and in tens from any number, forward and backward
- recognise the place value of each digit in a two-digit number (tens, ones)
- identify, represent and estimate numbers using different representations, including the number line
- compare and order numbers from 0 up to 100; use <, > and = signs
- read and write numbers to at least 100 in numerals and in words
- use place value and number facts to solve problems.

Place value – the value of each digit in a number

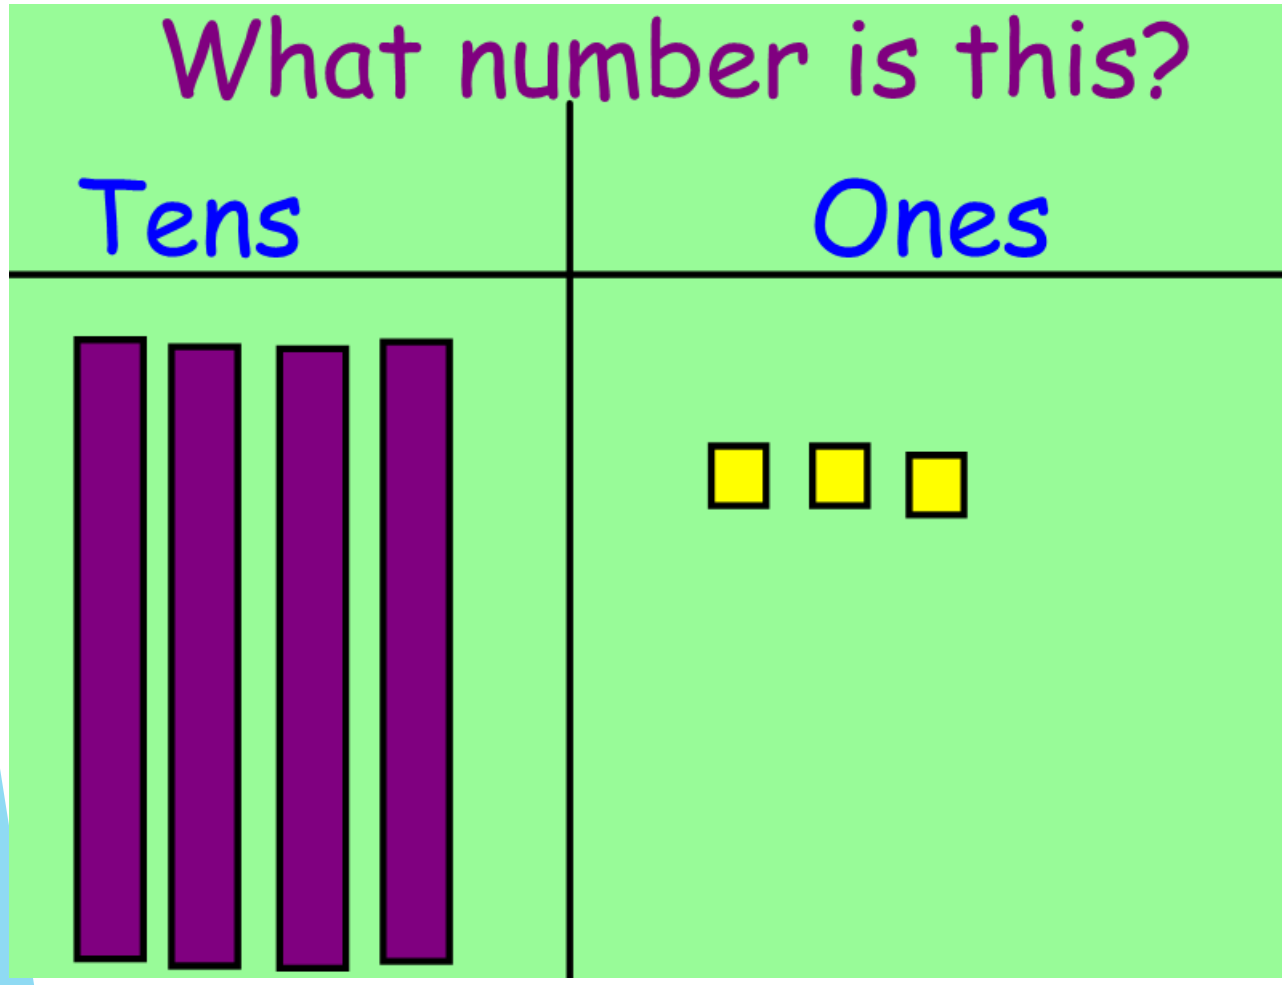
Resources - dienes

24

Arrow cards



Jottings



Resources

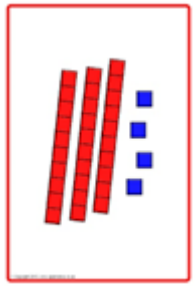
- Numicon
- Dienes (jottings - sticks and dots)
- Numberlines
- Beadstrings
- Multilink

Addition and Subtraction

- solve problems with addition and subtraction:
- using concrete objects and pictorial representations, including those involving numbers, quantities and measures
- applying their increasing knowledge of mental and written methods
- recall and use addition and subtraction facts to 20 fluently, and derive and use related facts up to 100
- add and subtract numbers using concrete objects, pictorial representations, and mentally, including:
- a two-digit number and ones
- a two-digit number and tens
- two two-digit numbers
- adding three one-digit numbers
- show that addition of two numbers can be done in any order (commutative) and subtraction of one number from another cannot
- recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.

How we teach addition

- Resources
- Jottings
- Numbers that do not bridge 10



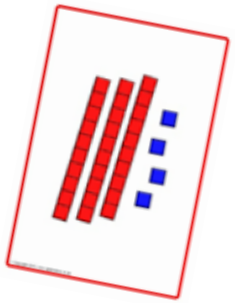
1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

24 + 11 =

Can you solve it using jottings?

45 + 20 =

How we teach addition



- Resources
- Jottings
- Numbers that bridge 10 (adding two numbers whose total is greater than 10)

Exchange

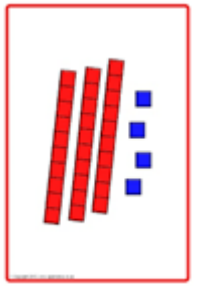
Addition: Every time you have 10 ones, swap 10 ones for 1 ten stick

28 + 17 =

How we teach subtraction

- Resources
- Jottings
- Numbers that do not bridge 10

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100



24 - 11 =

Can we solve it using jottings?

56 - 31 =

How we teach subtraction

- Resources
- Jottings
- Numbers that bridge 10

Exchange

Subtraction: Swap 1 ten stick for 10 ones

Can we solve it using jottings?

43 - 18 =

How we teach subtraction

- Blank number lines

Show me on a blank number line!

30 - 14 =

Multiplication and Division

- recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers
- calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (×), division (÷) and equals (=) signs
- show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts.

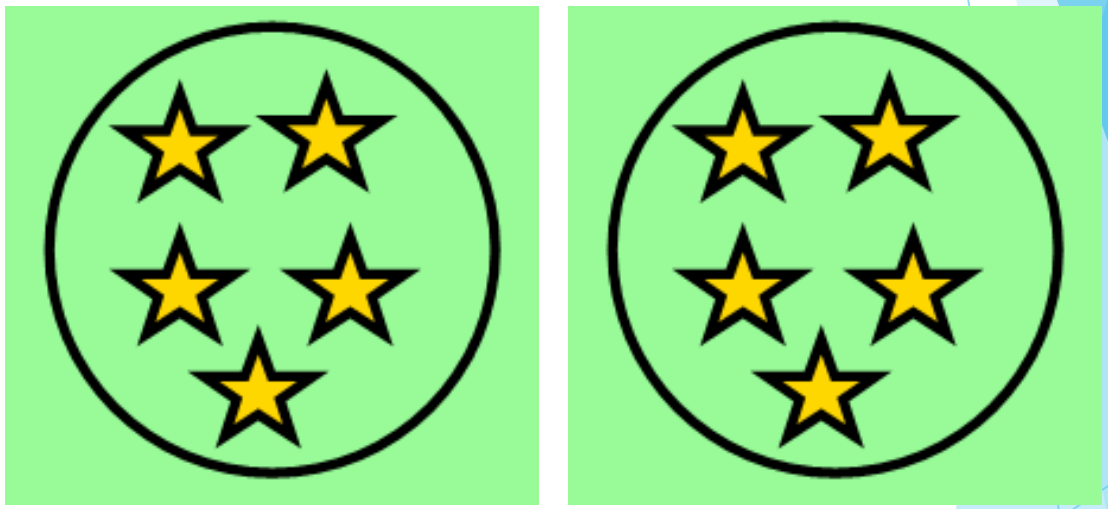
How we teach multiplication

What does 2 x 5 mean?

2 lots of 5 = 10

2 groups of 5 = 10

2x5=10



There are 10 pencils in a pack.
Sarah has 3 packs.
How many pencils are there altogether?

How we teach division

Dividing means sharing equally!

$18 \div 6 =$

Supporting your child at home / useful websites

- 1 minute maths app
- White Rose Maths website
- https://www.topmarks.co.uk/
- Number games / board games
- Progression in calculations booklets (on google)
- **Real life opportunities** – paying with money – working out change
- Measuring for baking etc
